

Platform Registration Guide & LinkedIn Profile Setup

Wike-Young Kennedy Hachimeganum

Port Harcourt, Rivers State, Nigeria | wikeyoung41@gmail.com

Step-by-step instructions for registering on every recommended platform, creating your LinkedIn profile, and optimizing your applications for AI data annotation work.

1. Payment Accounts (Do This First)

Before registering on any AI platform, set up these payment accounts. You will need them to receive earnings. Most platforms require payment setup before you can accept paid tasks.

Step 1: PayPal Account

PayPal is the most widely accepted payment method across all platforms reviewed. Set this up first.

Go to **paypal.com/ng** and click "Sign Up"

Choose **Personal Account** (not Business)

Use email: **wikeyoung41@gmail.com**

Enter your real name: **Wike-Young Kennedy Hachimeganum**

Phone: **+234 816 012 4516**

Address: **Port Harcourt, Rivers State, Nigeria**

Verify your email address (check spam folder)

Link your bank account or debit card for withdrawals

Complete identity verification (upload valid ID)

Step 2: Payoneer Account (Backup)

Payoneer is accepted by some platforms as an alternative to PayPal. Set it up as a backup.

Go to **payoneer.com** and click "Register"

Use the same email: **wikeyoung41@gmail.com**

Enter your real details (same as PayPal)

Choose "Withdraw to local bank account" for Nigeria

Complete identity verification

2. Platform Registration Steps

Register on Tier 1 platforms first (CrowdGen, TELUS Digital, Prolific), then move to Tier 2. Each registration takes 20-45 minutes. Complete all registrations within your first week.

2.1 CrowdGen (Appen) -- TIER 1 -- Register Immediately

Go to: crowdgen.com

Click: "Get Started" or "Join Now"

Sign up with: wikeyoung41@gmail.com

Full name: Wike-Young Kennedy Hachimeganum

Country: Nigeria

City: Port Harcourt

Languages: English (Fluent), Ikwerre (Native), Igbo (Basic)

Education: O'Level / Secondary School Certificate

Skills: Data annotation, writing, internet research, attention to detail

Important: COMPLETE EVERY FIELD. Empty profiles get fewer project matches.

After registration: Browse available projects. Apply to ALL that match your skills.

Before tests: Read ALL project guidelines carefully. Study them twice.

KEY TIP: On CrowdGen, your Ikwerre language skill is a MAJOR advantage. Many projects need Nigerian language speakers. Make sure to list it prominently.

2.2 TELUS Digital -- TIER 1 -- Register Immediately

Go to: telusinternational.ai

Click: "Join Us" or "Apply Now"

Create account: with wikeyoung41@gmail.com

Full details: Wike-Young Kennedy Hachimeganum, Port Harcourt, Nigeria

Languages: English, Ikwerre, Igbo (emphasize ALL languages)

Assessment: You will receive search evaluation and/or map rating tests

Preparation: Practice with: searchqualityevaluator.com and similar free resources

Important: TELUS onboarding can take weeks. Register early and be patient.

2.3 Prolific -- TIER 1 -- Register Immediately

Go to: prolific.com/participants

Click: "Create Account" or "Sign Up as Participant"

Email: wikeyoung41@gmail.com

Demographic profile: FILL IN EVERYTHING. Age, gender, education, location, language skills.

Why detail matters: Researchers filter participants by demographics. More detail = more studies.

After registration: Studies will appear on your dashboard. Accept ones you qualify for.

Payment: Automatic via PayPal after study completion. Usually within days.

2.4 Alignerr -- TIER 2 -- Register and Test

Go to: alignerr.com

Click: "Join" or "Apply"

Sign up: with wikeyoung41@gmail.com

Complete profile: Include all skills, languages, areas of expertise

AI Interview: Complete the AI-guided interview with "Zara" (their AI interviewer)

Important: Test if Nigeria is accessible. If projects are not visible after registration, it may be geo-restricted.

Pay attention: Alignerr has a 4.1/5 Trustpilot rating. Good platform if accessible.

2.5 Welocalize / Welo Data -- TIER 2 -- Register and Test

Go to: welodata.ai/join-the-community

Click: "Join the Community"

Create account: with wikeyoung41@gmail.com

Language skills: English (Fluent), Ikwerre (Native) -- THIS IS YOUR BIGGEST ASSET HERE

Why Ikwerre matters: Welocalize specializes in localization. Nigerian language speakers are in demand.

Take tests: Language proficiency tests in English and any Nigerian language you speak

Account setup: May need multiple sub-accounts (their system is complex, be patient)

2.6 Mercor -- TIER 2 -- Register and Test

Go to: work.mercor.com

Sign up: with wikeyoung41@gmail.com

Browse roles: Look for entry-level AI training roles (\$10-\$15/hour range)

Apply to roles: That match your skills (writing, evaluation, general tasks)

If blocked: Accept and move on. Do NOT try to bypass geo-restrictions.

2.7 Outlier -- TIER 3 -- Try Once

Go to: outlier.ai

Apply: with wikeyoung41@gmail.com

Select expertise: Writing, general knowledge, or any relevant domain

Take assessment: If allowed (domain-specific test)

If geo-blocked: Accept immediately. Do not waste time trying to bypass.

If accepted: Prioritize this platform. Best pay rates in the industry.

3. LinkedIn Profile Setup

LinkedIn is NOT required for AI platform applications, but having a professional profile helps in two ways: (1) Some platforms and AI companies check LinkedIn during verification, and (2) It opens doors to direct freelance AI training opportunities that pay more than platforms. Create this in your second week.

Step-by-Step LinkedIn Creation

Step 1: Account Creation

- Go to **linkedin.com**
- Click "Join now"
- Use email: **wikeyoung41@gmail.com**
- First name: **Wike-Young**
- Last name: **Hachimeganum**
- Use a clear, professional photo (headshot, plain background, good lighting)

Step 2: Headline (The Line Under Your Name)

This is the most important text on your profile. Copy this exactly:

AI Data Annotator | Multilingual Contributor (English, Ikwerre, Igbo) | Remote Work Specialist | Quality-Focused

Step 3: About Section

This goes in the "About" section of your profile. Edit it to match your actual experience as you grow:

"Detail-oriented and motivated remote contributor specializing in AI data annotation, text evaluation, and multilingual data quality. Native Ikwerre speaker with fluent English and partial Igbo comprehension, providing unique capabilities for Nigerian-language AI training and localization projects. Experienced in search relevance evaluation, image labeling, text classification, and AI output quality assessment across multiple platforms including CrowdGen, TELUS Digital, and Prolific. Committed to maintaining quality scores above 90% through consistent guideline adherence and continuous improvement. Available for freelance AI training projects and long-term contributor roles. Based in Port Harcourt, Nigeria with reliable internet access and flexible scheduling."

Step 4: Experience Section

Add this as your current position:

Field	What to Enter
Title	AI Data Annotation Contributor
Company	Independent / Freelance

Start Date	July 2026 (or your actual start date)
Description	Contributing to AI model training through data annotation, text evaluation, and quality assessment on platforms including

Step 5: Skills Section

- AI Data Annotation
- Text Evaluation
- Search Relevance Assessment
- Image Labeling
- Multilingual Data Collection
- Quality Assurance
- Remote Work
- English (Fluent)
- Ikwerre (Native)
- Igbo (Basic)
- Internet Research
- Attention to Detail
- Time Management
- Microsoft Office
- Google Workspace

Step 6: Education

Enter your O'Level certificate. Even though it is secondary education, having it listed shows completeness. If you have any online course certificates (Coursera, freeCodeCamp, etc.), add those under "Licenses and Certifications."

Step 7: Profile URL

Customize your LinkedIn URL after creation. Go to your profile, click "Edit public profile", and change the URL to something like: **linkedin.com/in/kennedy-hachimeganum**

4. Platform-Specific Profile Tips

Each platform has different profile optimization strategies. Here is exactly what to emphasize on each one.

Platform	What to Emphasize	What to Avoid
CrowdGen	Ikwerre + English bilingual skills. Any domain knowledge (multilingual Nigerians, etc.)	Do not list irrelevant skills or experience. Do not use
TELUS Digital	Search evaluation experience. Nigerian web search familiarity	Do not list irrelevant skills. (Google Maps knowledge, etc.) Do not use

Prolific	Complete ALL demographic fields. Honest responses to screening questions. AI generated responses are flagged.	Don't use AI to generate responses. They detect this.
Alignerr	Writing ability. Critical thinking. Any domain expertise (even hobbies). General knowledge. Be honest.	Do not cheat. General knowledge tests are real.
Welocalize	IKWERRE LANGUAGE IS YOUR BIGGEST ASSET. Also English proficiency. To get into knowledge of Rivers State.	WERE. Also English proficiency tests. To get into knowledge of Rivers State.
Mercor	Any expertise areas. Writing quality. Availability for coding roles.	Do not apply for coding roles unless you actually code.
Outlier	Writing quality. Domain expertise if any. Critical thinking and reasoning ability.	Do not use AI to generate responses during assessment. They test for this specifically.

5. Common Mistakes That Get Nigerians Rejected

These are the most common reasons Nigerian applicants fail to get approved or lose access. Avoid ALL of these.

Using VPN to bypass geo-restrictions. Platforms actively detect VPNs. You will be permanently banned. If a platform is not available in Nigeria, accept it and move on.

Using ChatGPT or AI tools to complete tasks. Every platform tests for AI-generated responses. Detection is sophisticated. Permanent ban, no appeal.

Rushing through qualification tests without studying guidelines. Tests are designed to verify you read the instructions. Failed tests mean wasted time and delayed earnings.

Leaving profile fields empty. Empty profiles get fewer project matches. Complete EVERY field, especially language skills.

Ignoring Nigerian language skills. Ikwerre is a valuable, rare language. Platforms like Welocalize specifically need Nigerian language speakers. Always list it.

Using a casual email address. Your email (wikeyoung41@gmail.com) is professional. Do not create additional accounts with nicknames or casual names.

Sharing accounts with friends. Account sharing is detected and results in permanent bans for all involved accounts.

Not reading task guidelines before starting. Each project has specific rules. Skipping guidelines leads to rejected work and quality score drops.

Giving up after one bad week. The first week is the hardest. Most contributors do not see earnings until week 3-4. Persistence is the difference between success and failure.

Spreading yourself too thin. Start with 2-3 platforms. Master them before adding more. Quality > Quantity.

6. Your First 7 Days: Daily Checklist

Follow this exact schedule for your first week. Check off each item in your 90-Day Tracker spreadsheet.

Day	Tasks	Time Required
Day 1	Create PayPal account. Create Payoneer account. Set up workspace. Take typing speed test (10FastFingers.com).	2-3 hours
Day 2	Register on CrowdGen. Complete full profile. Apply to matching projects. Register on TELUS Digital.	2-3 hours
Day 3	Register on Prolific. Complete ALL demographic fields. Register on Alignerr. Complete AI interview.	2-3 hours
Day 4	Register on Welocalize. Register on Mercor. Attempt Outlier registration. Update 90-Day Tracker.	2-3 hours
Day 5	Begin CrowdGen qualification tests. Study guidelines for 1 hour before each test. Check Prolific for studies.	3-4 hours
Day 6	Complete TELUS Digital assessments. Continue CrowdGen tests. Accept Prolific studies.	3-4 hours
Day 7	Review all registrations. Follow up on pending verifications. Plan Week 2 schedule. Update tracker.	2 hours

This guide was prepared specifically for Wike-Young Kennedy Hachimeganum based on the comprehensive AI platform research report. Follow it step by step, track your progress in the 90-Day Tracker spreadsheet, and reference the main research PDF for detailed platform analysis. Your success depends on consistency, patience, and following the rules. Start today.
